

RIDE *for* **JOY**

Veterans and active military personnel suffering from physical, mental and or emotional injuries associated with their service.

The RFJ veteran participants have seen PTSD, anxiety and isolation disorders, depression, traumatic brain injuries, MS and more. Equine therapy is a unique and powerful therapy in that it concurrently provides cognitive, psychological, physical and emotional benefits. One veteran told RFJ that they *"kindled a fire in him that he didn't know existed."*
